

Volunteer Hazard Mapping Corps (VHMC) Workshop Series

Sponsored by the
SDSU branch of ASPRS

The Volunteer Hazard Mapping Corps (VHMC) is a group of volunteer geospatial analysts that will assist the city and county of San Diego in processing incoming data, analyzing results, and producing map products to assist disaster managers during and following natural and anthropogenic hazards.

Part 1: Friday, November 7th 10:00-2:00

Paul Hardwick will provide an introduction to San Diego County Office of Emergency Services (OES) operations.

Part 2: Friday, November 21st 10:00-12:00

Dr. Ming Tsou will present information on internet mapping services.

Part 3: Friday, December 5th 10:00-12:00

Dr. Douglas Stow and Pete Coulter will present image processing techniques for wildfire scenarios.

Volunteers will be trained in a 3-part workshop series presented by Paul Hardwick (GIS manager for San Diego County Office of Emergency Services) and SDSU Geography faculty and staff.

Workshops will be held in the front room of CESAR (Nasatir Hall 380)

SAN DIEGO STATE
UNIVERSITY

Interested? SDSU undergraduates and graduates are encouraged to get involved in the VHMC regardless of skill set.

Contact Caitlin Chason at clchason@gmail.com or Chris Lippitt at christopher.lippitt@gmail.com for additional information regarding the workshop series.
